TITLE : FERRIS WHEEL

ABSTRACT : PROBLEM TO BE SOLVED: To provide a Ferris wheel provided with a novel arrangement of a track for elevated track vehicles.

SOLUTION: This Ferris wheel comprises a fixed frame 1; the track 2 laid along an outer periphery of the fixed frame 1; a plurality of riding cage supporting frames 5 on which riding cages 3 are rotatably pivoted and travel on wheels 4 rolling on the track 2; and a driving mechanism E for running the riding cage supporting frames 5. Another track for the elevated track vehicles is provided in a middle area including the center of the fixed frame 1.
